

Welcome to Bullion Signals

Welcome

Thanks for buying a Bullion Signals pass. Your access is usually switched on the same day, within 2–6 hours of purchase, and this guide takes you from purchase to your first reading.

Your pass includes:

- **Astro-Macro Momentum Index (0–100)** for gold and silver, recalculated every hour, with 7-day and 30-day history.
- **Four session readings** (Asia, Europe Open, US Morning, US Afternoon), each Bullish, Neutral or Bearish with a confidence level.
- **"Why today's reading"**: what each layer (planetary cycles, macro data, news, price action) contributed, in plain English.
- **Event strip and market feeds**: central-bank dates, data releases and planetary transit dates on one timeline.
- **Private watchlist**: note your own price levels against live spot. It stays in your browser.
- **Support by email**; 1-Year Pass holders get priority replies.

Pass	Price	Access
3-Month Pass	\$99	90 days from activation
1-Year Pass	\$299	365 days from activation

Both are one-time payments. Nothing renews automatically.

Getting access

A person checks each purchase and switches your access on, so there are a few hours between paying and your first sign-in.

1. **Buy your pass** in the Bullion Signals Patreon Shop: patreon.com/BullionSignals/shop.
2. **Open this guide** from the Purchases tab in your Patreon account. It unlocks as soon as you pay.

3. **Wait for activation.** We verify your purchase and switch on access for the email address on your Patreon account, usually within 2–6 hours and the same day. We email you when it's done.
 - o Want to sign in with a different email? Reply to our email or write to bulliontradingsignals@gmail.com before activation and we'll use that one.
4. **Sign in** at app.bullionsignals.com with the same email we activated. Click "Sign in with Google" and choose that account.
5. **Bookmark the dashboard.** Next time, open the bookmark and you'll stay signed in on that browser.

If you see "Your access has expired / not found" after step 4, you're probably signed in with a different email from the one we activated. Click "Sign in with different account" and try again, or email us.

Reading the dashboard

The index describes the backdrop, not the next tick: read it as context for your own decisions, never as a trade instruction.

Momentum Index bands

Index	Band	What it means
70–100	Strong tailwinds	Planetary, macro and news factors mostly line up in the metal's favor
30–70	Mixed	Factors disagree; the reading can stay here for weeks
0–30	Strong headwinds	Factors mostly line up against the metal

Session readings

Each of the four sessions shows a bias (Bullish, Neutral or Bearish) and a confidence level (High, Moderate or Low). Each card lists the session's hours. During a flagged geopolitical shock, crisis mode sets every session to Neutral until conditions settle.

"Why today's reading"

Open it to see which of the five layers pushed the number up or down. If one layer drove the reading, it says so.

Watchlist and currency

Add the price levels you care about to compare them with live spot. Your watchlist is stored only in your browser, so it won't follow you to another device. Prices show in US dollars by default; switch to INR with the currency button.

Good to know

- **When your pass ends:** access switches off on the end date. We email you a few days before. Nothing renews by itself; buy a new pass in the Patreon Shop to continue.
- **Upgrading:** move from the 3-Month to the 1-Year Pass within your first 30 days and we add your unused days to the new pass.
- **Sharing:** your pass is for one person. Access is tied to your email, so a shared link won't open for anyone else, and we may suspend access we believe is being shared.
- **Refunds:** passes are final once activated, with exceptions such as access never activated, a duplicate purchase or an extended outage. See the Refund Policy at bullionsignals.com.
- **Free Weekly Outlook:** members can also get the Monday email. Sign up at bullionsignals.com.

Need help?

Email bulliontradingsignals@gmail.com or use the contact form at bullionsignals.com, from the email on your Patreon account. A person replies, usually within hours.

Important

Bullion Signals is educational research. It does not give buy or sell recommendations, price targets or financial advice. Planetary cycles are presented as a non-causal, alternative framework, and past readings don't guarantee future results. Trading gold, silver and their derivatives carries risk of loss; speak to a licensed adviser where you live before acting.
